Bosch Home Appliances 1 week ago Hi Emily G., Thank you for your question. We're so sorry to hear you're having issues with your appliance. E29 generally means that no water filling detected by the flow sensor. Some possible reasons for this could be the water tap is closed, the filter or supply is blocked, or that the water pressure is incorrect.

<http://www.dolciariavarone.com/images/canon-pixma-5000-printer-manual.pdf>

You may want to take a look at the above reasons to ensure the matter can't be resolved by some basic trouble shooting. If you don't find a blockage, the water pressure is fine and the tap is open, then you may need to have a technician inspect the unit. Please contact us on 1300 369 744, and we'll investigate for you. Regards, Bosch Home Australia. Regards, Bosch Home Australia Like Report Bruce asked 1 year ago Logixx 8 WAS32741AU My WAS32741AU tripped the main household fuse when it was mid cycle. I found objects in the drain pipe leading to the water pump, checked for any moisture around the interior of the cabinet, and tried to start a new cycle, but it has tripped the fuse again. There is carbon coating the wire loom that plugs into the motor; could this indicate that the brushes are worn out, and would that be the cause of the tripped fuse. Cheers, Bruce. Like Report Bruce 1 year ago After contacting Bosch Home Appliances via email as instructed, I was disappointed to find it appears that they only post on this site to ultimately sell you a new replacement product, not to give you any advice as to what the fault may be that is affecting your current machine or how it can be fixed. Like Report Bosch H. Bosch Home Appliances 1 year ago Hi Bruce, thank you again for response.

Please be advised this matter was passed through to our technician to review. It was determined that brushes could be the reason, however there also could be a number of other factors. The only way to guarantee the exact cause is to have a technician to assess the appliance. Like Report Rob 1 year ago Hi Tony, I'm having the same problem. Did you find out how to reset that model. Cheers, Rob Like Report tonym 1 year ago Hi Rob, Yes you can reset the error code by the following steps. 1. turn the appliance knob to the off or reset position, 12 o'clock. 2. turn the knob to the 6 o'clock position. 3. press and hold the spin button and while holding the spin button turn the knob to the 7 o'clock position. Continue holding the spin button for about 5 seconds then release the spin button and now turn the knob to the off position. When you turn it back on it should have cleared the error code. NOTE it took 3 times for me to get it right.
